This is a marketing communication. This is not a contractually binding document, and its issuance is not mandated under any law or regulation of the European Union. This marketing communication does not include sufficient detail to enable the recipient to make an informed decision. Please refer to the Prospectus of the UCITS and to the KIID before making any final investment decisions.

Objective and investment policy

Impax Global Equity Opportunities Fund (the Fund) aims to generate long term (5+ years) capital growth by investing globally in a portfolio of shares of public quoted companies. With a significant ESG integration approach, the Fund also aims to invest in companies that are well-positioned in the transition to a more sustainable global economy, as well as seeking to harness the opportunities. The Fund's investment universe is assessed through the “Impax Sustainability Lens” which aims to enable the prioritisation of investment in activities that have high opportunities (for example addressing climate change, providing access to finance and solving healthcare challenges) and low risks (for example health & safety vulnerability, bribery and corruption, climate change, biodiversity loss and pollution & waste).

The Fund has been classified as an Article 8 financial product for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (“SFDR”).

The Fund is actively managed and is not managed in reference to a benchmark.

For more details on our ESG policy and how this is implemented in our funds, please see **ESG Policy**.

Risk and reward profile

Please refer to the **fund profile** for further information.

The Impax Global Equity Opportunities Fund has been awarded the Towards Sustainability Quality Standard and label, developed on the initiative of Febelfin.

Fund specific risks

Market risk: The Fund's investments are subject to market fluctuations, so they can fall as well as rise in value.

Currency risk: Currency Risk: Fluctuation in exchange rates may reduce investment gains or income and increase losses. Additional risk should be considered where the Fund's base currency differs from the currency of your own investments

Emerging market risk: The Fund's investments may be adversely affected by uncertainties such as international political developments, changes in government policies, changes in taxation, restrictions in foreign investment and the movement of money from one country to another, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made.

Derivative risk: The Fund may invest in warrants and convertible bonds

(financial derivative instruments). These instruments have additional risks such as legal or liquidity risk (the inability to sell the contract due to lack of buyers in the market). These risks can have adverse impacts on the overall value of the Fund.

Liquidity risk: Substantial selling by shareholders may necessitate the Investment Manager having to sell investments, incurring losses that would otherwise not have arisen.

Investment risk: The Fund may invest in Participatory Notes (an instrument that is similar to owning shares) which may expose investors to losses where the issuer of the Participatory Note becomes insolvent or defaults on their obligations.

Sustainability risk: Sustainability risks are environmental, social and governance events or conditions whose occurrence could have an actual or potential material negative impact on the value of the Fund and all known types of risk of the Fund.

Impax Global Equity Opportunities Fund

Factsheet | 31 July 2024

General risks

- **Market fluctuations:** Potential investors should note that the investments of each Fund are subject to market fluctuations and that there can be no assurance that any appreciation in value will occur. The value of investments and the income from them, and therefore the value of, and income from the Shares, can go down as well as up and an investor may not get back the amount invested.
- **Cross liability between funds:** The Company is established as a segregated portfolio company. As a matter of Irish law, the assets of one Fund will not be available to satisfy the liabilities of another. However, the Company is a single legal entity which may operate or have assets held on its behalf or be subject to claims in other jurisdictions which may not necessarily recognise such segregation. There is no guarantee that the courts of any jurisdiction outside Ireland will respect the limitations on liability associated with segregated portfolio companies nor is there any guarantee that the creditors of one Fund will not seek to enforce such Fund's obligations against another Fund.
- **Expenses charged to capital:** Shareholders should note that all or part of expenses may be charged to the capital of a Fund in order to enhance distribution levels. This will have the effect of lowering the capital value of an investment in a Fund.
- **Substantial repurchases:** Substantial repurchases by Shareholders may necessitate liquidation of investments. It is possible that losses may be incurred due to such liquidations that might otherwise not have arisen.
- **Temporary suspension:** Investors are reminded that in certain circumstances their right to redeem or convert Shares may be temporarily suspended.
- **Dependence on the principals of the Investment Manager:** The principals of the Investment Manager have authority to control the investment management of the Company. If, for any reason, the Investment Manager were to lose the services of these individuals, the Company might be adversely affected.
- **Performance fee:** Any Performance Fee paid to the Investment Manager may create an incentive for the Investment Manager to cause a Fund to make investments that are riskier or more speculative than would be the case if there was no Performance Fee in place.
- **Political or regulatory risks:** The value of a Fund's assets may be affected by uncertainties such as international political developments, changes in government policies, changes in taxation, restrictions in foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made.
- **Controlling shareholder:** There is no restriction on the percentage of the Company's Shares that may be owned by one person or a number of connected persons. It is possible, therefore, that one person, including a person or entity related to the Manager or the Investment Manager, may obtain control of the Company or of a Fund.

Important information

This is marketing material. Full details of the objectives, investment policies and risks are located in the prospectus, which is available with the key investor information documents (KIID) and/or key information document (KID) before making any final investment decision.

This document has been issued by Impax Asset Management Ireland Limited which is authorised and regulated by the Central Bank of Ireland and which is the UCITS management company (the "Management Company") of Impax Funds (Ireland) Plc (the "Fund(s)"). The Fund is an umbrella type investment company with variable capital and is incorporated with limited liability under the laws of Ireland with registered number 393658. The information is not for use within any country or with respect to any person(s) where such use could constitute a violation of the applicable law. Past performance does not predict future returns. Information on past performance refers to the past and past performance is not a reliable indication of future performance. The value of investments may go down as well as up and is not guaranteed. Changes in rates of exchange may cause the value of investments to fluctuate. The annual investment management charge and other charges are generally deducted from income, although a portion may be deducted from capital of the Fund. Where charges are deducted from capital, the potential for capital growth will be reduced. It is important to choose a fund that does not exceed the risk level you are prepared to accept. Portfolio characteristics, including specific holdings, country, sector and industry exposure, are as of the date indicated and are subject to change without notice. Portfolio characteristics illustrate the application of Impax's investment style only and should not be considered a recommendation by Impax. Any reference to a specific security does not constitute a recommendation to buy, sell or hold any specific fund or security.
