Important information on risk

Investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Because the Impact Criteria and/or Nuveen's Environmental Social Governance (ESG) investment criteria may exclude investments of certain issuers for non-financial reasons, the Fund may forgo some market opportunities available to funds that do not use these criteria. This may cause the Fund to underperform the market as a whole or other funds that do not use an Impact Criteria or ESG investment strategy or that use a different methodology or different factors to determine an investment's impact and/or ESG investment criteria. **Non-U.S. investments** involve risks such as currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These risks are magnified in **emerging markets**. **Credit risk** arises from an issuer's ability to make interest and principal payments when due, as well as the prices of bonds declining when an issuer's credit quality is expected to deteriorate. **Interest rate risk** occurs when interest rates rise causing bond prices to fall. The issuer of a debt security may be able to repay principal prior to the security's maturity, known as **prepayment (call)** risk, because of an improvement in its credit quality or falling interest rates. In this event, this principal may have to be reinvested in securities with lower interest rates than the original securities, reducing the potential for income. Investments in below investment grade or **high yield securities** are subject to liquidity risk and heightened credit risk. Investments in debt securities issued or guaranteed by governments or governmental entities are subject to the risk that an entity may delay or refuse to pay interest or principal on its **sovereign debt** because of cash flow problems, insufficient foreign reserves, or political or other considerations. In this event, there may be no legal process for collecting sovereign debts that a governmental entity has not repaid. A complete description of the risks of investing in the Fund can be found in the Key Investment Information Document(s) (KIID(s)) and the Prospectus.

Responsible investing incorporates Environmental Social Governance (ESG) factors that may affect exposure to issuers, sectors, industries, limiting the type and number of investment opportunities available, which could result in excluding investments that perform well.
