

First Trust Vest Nasdaq-100[®] Moderate Buffer UCITS ETF - September

The Fund is an actively managed Fund which seeks to provide investors with returns (before fees and expenses) that match the price return of the Nasdaq-100[®] Index (the "Index"), up to a predetermined upside cap, while providing a buffer (before fees and expenses) against the first 15% of Index losses, over a specified one year period. Under normal market conditions, the Fund will invest substantially all of its assets in Flexible Exchange[®] Options ("FLEX Options") that reference the price performance of the Nasdaq-100[®] Index. FLEX Options are customised equity or index put and call option contracts that are cleared by the Options Clearing Corporation (the "OCC") and traded on Regulated Markets in the US (and in particular the Cboe Options Exchange). The ETF can be held indefinitely, resetting at the end of each outcome period (approximately annually).

Fund performance is the performance of the share class since its inception, shown net of fees including re-invested dividends in the base currency of the share class which is in USD. Performance can go up as well as down, and investors may lose some or all of their capital. Returns may increase or decrease as a result of currency and exchange rate fluctuations. Please refer to the 'Risks' section on Page 4 for more details on risks associated with an investment in the fund.

¹The ongoing charges figure is based on the Fund's annual management fee, whereby the Investment Manager is responsible for the costs involved in running the Fund. In the event that the Fund's running costs exceed the stated figure the Investment Manager shall pay the excess from its own assets. The ongoing charges figure excludes portfolio transaction costs. Details of the transaction costs are available from your broker or financial advisor and at www.ftgportfolios.com. The figure may vary from year to year.

Fund Sub-Investment Manager: Vest

First to Market:

Vest was the first issuer to introduce a Target Outcome 1940 Act investment product in 2016, and has subsequently launched numerous Target Outcome-oriented products.

Inventor of Target Outcome Investing:

Vest pioneered this space starting in 2012 with a filed patent for outcome-oriented methods in investment products. In partnership with Cboe and S&P, they developed indices that sought to deliver buffer protection on losses for the S&P 500 over a specified Target Outcome period, with upside participation to a cap.

- The First Trust Vest Nasdaq-100® Moderate Buffer UCITS ETF – September is actively managed using a “Target Outcome Investments® strategy” which seeks to produce a pre-determined investment outcome during a specified time period (the “Target Outcome Period”) based on the performance of the underlying reference asset.
- The outcome may only be realised for an investor who holds shares on the first day of the Target Outcome Period and continues to hold them on the last day of the Target Outcome Period.
- The Fund invests substantially all of its assets in FLEX Options that reference the performance of the Nasdaq-100® Index. FLEX Options provide the ability to customise key contract terms, such as exercise prices, styles and expiration dates.
- The Fund resets approximately annually on the first day of each new Target Outcome Period by investing in a new set of FLEX Options that provide the buffer and cap for the new Target Outcome Period.
- For each Target Outcome Period, the Fund will construct a portfolio of purchased and written put and call FLEX Options.
- The Fund only seeks to provide shareholders that hold shares for the entire Target Outcome Period with the full target buffer against Nasdaq-100® Index losses (based upon the value of Nasdaq-100® Index at the time the fund entered into the FLEX Options on the first day of the Target Outcome Period) during the Target Outcome Period.
- The Fund will not terminate after the conclusion of the Target Outcome Period. After the conclusion of the Target Outcome Period, another will begin.
- There is no guarantee that the outcomes for a Target Outcome Period will be realised.
- The buffer and cap for each subsequent outcome period will likely differ from the initial outcome period.

Risks

- The Fund may not achieve its investment objective and the value of shares in the Fund may fall.
- Neither First Trust Global Portfolios Management Limited ("FTGPM") nor any of its affiliates, guarantees the performance or the future returns of the Fund.
- This product does not include any protection from future market performance.
- For other risks materially relevant to the Fund, please read the Prospectus and the related supplement for this Fund available at www.ftglobalportfolios.com.
