- Companies from the Eligible Universe that derive greater than or equal to 50% of their revenue from these sub-themes are considered as 'Pure-Play' companies. The Index will select a total of 50 pureplay securities by market capitalisation, if less than 50 pure-play securities qualify for inclusion, then all pure-play companies will be included in the final index.

- A single security cap of 4.5% is applied to securities within the buckets and the extra weight is proportionally distributed amongst the buckets.
