

PGIM EMERGING MARKET HARD CURRENCY DEBT FUND

FIXED INCOME 28 FEBRUARY 2025

The investment objective of the PGIM Emerging Market Hard Currency Debt Fund (the "Fund") is to seek to achieve a return through a combination of current income and capital appreciation while preserving invested capital. There is no assurance that such objective will be achieved. The Fund will be actively managed and will use the relative value approach through which it will seek to identify and capture market inefficiencies, such as mispriced securities relative to the Investment Manager's expectation, within the emerging market fixed income and foreign exchange markets with an actively-managed approach. The benchmark of the Fund is the J.P. Morgan EMBI Global Diversified Index. Please see the Company's Fund Documents as described below for additional information.

²The Credit Quality allocation is based on the current ratings methodology of Bloomberg Global Family of Indices, which is as follows: If each of the Ratings Agencies (Moody's, S&P, and Fitch) assigns ratings to an instrument, the methodology will attribute the middle rating to the instrument after dropping the highest and lowest ratings. If only two Ratings Agencies assign ratings, the methodology will attribute the more conservative (lower) rating of the two. If only one Ratings Agency assigns a rating, the methodology will attribute that rating.

Important Information

Risks

An investment in the Fund involves a high degree of risk, including the risk that the entire amount invested may be lost. The Fund is primarily designed to purchase certain investments, which will introduce significant risk to the Fund, including asset performance, price volatility, administrative risk and counterparty risk. No guarantee or representation is made that any Fund's investment program will be successful, or that such Fund's returns will exhibit low correlation with an investor's traditional securities portfolio.

Any investment in the Fund will be deemed to be a speculative investment and is not intended as a complete investment program. Investment in the Fund is suitable only for persons who can bear the economic risk of the loss of their investment and who meet the conditions set forth in the Fund Documents. There can be no assurances that the Fund will achieve its investment objective. Prospective and existing Investors should carefully consider the risks involved in an investment in the Fund, including, but not limited to, those discussed in the Fund Documents. Prospective and existing Investors should consult their own legal, tax and financial advisors about the risks of an investment in the Fund. Any such risk could have a material adverse effect on the Fund and its Shareholders.

The return may increase or decrease as a result of currency fluctuations. The use of financial derivative instruments may result in increased gains or losses within the Fund.

Where an investor's own currency is different from the currency of the Fund, the return on investment may be affected by fluctuations in the currency exchange rate. Also, the use of financial derivative instruments may result in increased gains or losses within the Fund. The NAV of the Fund is calculated on a daily basis and published on the Fund's website at the following address: www.pgimfunds.com.

Credit Risk: The value of debt securities may be adversely impacted by the erosion in the ability of the issuer to pay the amounts of interest and principal owed as they become due.

Custodial Risk: Assets which are traded in markets where custodial and/or settlement systems are not fully developed may be exposed to risk in circumstances where the custodian will have no liability.

Emerging Market Risk: The Fund invests in emerging markets, which may experience political, market, social, regulatory, and/or economic instabilities. These instabilities may reduce the

value of the Fund's investments.

Sovereign Debt Risk: Sovereign debt risk is the risk that the governmental entity that controls the repayment of sovereign debt may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt, due to factors related to its cash flow, its foreign reserves and political constraints, among others. If a governmental entity defaults, there may be few or no effective legal remedies for collecting on such debt.

Index Description

The J.P. Morgan EMBI Global Diversified Index (EUR Hedged) tracks total returns for USD-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, and Eurobonds. It limits the weights of those index countries with larger debt stocks by only including specified portions of these countries' eligible current face amounts of debt outstanding. The Index is used with permission. The Index may not be copied, used, or distributed without JP Morgan's prior written approval. Copyright 2024, JP Morgan Chase & Co. All rights reserved. Information has been obtained from sources believed to be reliable but JP Morgan does not warrant its completeness or accuracy.

The benchmark of the Fund may be changed from time to time to any other benchmark that is

generally representative for the Fund. Shareholders will be notified of any change in the benchmark of the Fund in the periodic reports of the Company following such change. Investors should note that the Fund does not intend to track the benchmark. While the Fund is actively managed, the benchmark will be used for risk management purposes (performing additional checks on holdings in the Fund with a weighting over or underweight the benchmark's holdings) and performance comparison purposes.

The use of benchmarks has limitations because portfolio holdings and characteristics of the Fund will differ from those of the benchmark, and such differences may be material. All indices and averages are unmanaged. You cannot make an investment directly in an index or average.
