

KraneShares MSCI China Clean Technology Index UCITS ETF

KraneShares MSCI China Clean Technology Index UCITS ETF is a sub fund of KraneShares ICAV (the "ICAV"). The ICAV is authorised as a UCITS in Ireland and regulated by the Central Bank of Ireland.

This is a marketing communication. Investors should read the Prospectus, Supplement and UK KIID and/or PRIIP KID prior to investing.

Investment Strategy:

The KraneShares MSCI China Clean Technology Index ETF (KGRN) is a passively managed fund that seeks to track the performance of the MSCI China IMI Environment 10/40 (USD Net) Index. The Index is comprised of securities that derive at least 50% of their revenues from environmentally beneficial products and services. The Index is based on four key Clean Technology environmental themes: Alternative Energy, Sustainable Water, Pollution Prevention and Energy Efficiency. The Index aims to serve as a benchmark for investors seeking exposure to Chinese companies that focus on contributing to a more environmentally sustainable economy by making efficient use of scarce natural resources or by mitigating the impact of environmental degradation. Constituent selection is based on data from MSCI Environmental, Social, and Governance (ESG). KGRN has been classified as an Article 8 investment under the EU Sustainable Finance Disclosure Regulation (SFDR).

China's Environmental Protection Highlights:

- China is projected to account for nearly 60% of new renewable energy capacity that is expected to come online globally by 2028¹.
- China is expected to have renewable energy account for over 40% of its electricity consumption by 2027¹.
- China plans to hit peak emissions before 2030 and reach carbon neutrality by 2060². In 2021, China launched its national emission trading scheme (ETS)—now the largest carbon market in the world, which should help the country meet its emission reduction goals.

KGRN Features:

- Access to China's fast-growing environmental protection industry that has rapidly become the largest renewable energy market in the world¹.
- Exposure to companies that stand to benefit from China's increased focus and spending on clean energy technologies.

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume.

Narrowly focused investments typically exhibit higher volatility. Internet companies are subject to rapid changes in technology, worldwide competition, rapid obsolescence of products and services, loss of patent protections, evolving industry standards and frequent new product productions. Such changes may have an adverse impact on performance.
