The Sub-Fund is actively managed, seeking to deliver excess returns over the Sub-Fund's benchmark. The holdings may or may not be components of the benchmark and the Investment Manager has broad discretion to deviate from the benchmark securities, weightings and risk characteristics. The degree to which the Sub-Fund resembles the composition and risk characteristics of the benchmark is not a specifically targeted outcome and could vary over time, and the Sub-Fund's performance may be meaningfully different from the Sub-Fund's benchmark. Source of benchmark: MSCI. The benchmark from inception was the HSBC Smaller Europe (Inc. UK) Index, which was renamed to the Euromoney Smaller European Companies Price Index on 1 October 2013 as a result of an acquisition. With effect from 27 October 2016, the benchmark was changed to Euromoney Smaller European Companies Total Return Net Index (renamed as EMIX Smaller European Companies Total Return Net Index with effect from 15 November 2017) as the Investment Manager considers the current benchmark more reflective of the Sub-Fund's investment strategy than the previous benchmark. With effect from 1 July 2023 the benchmark of the Sub-Fund was changed to MSCI Europe Small Cap Index. The rationale for the change is that the benchmark, EMIX Smaller European Companies Total Return Net will be retired by the index provider, S&P Global. The Investment Manager has therefore identified the new benchmark as an appropriate replacement.

GLOSSARY

Alpha: Measures the relative performance generated by the fund compared to the benchmark. An alpha of 1.0 indicates that the fund has outperformed its benchmark by 1%, after adjusting for risk of the benchmark.

Beta: Reflects sensitivity of the fund's returns to that of benchmark returns. A beta of 1.05 suggests that the fund could perform 5% better than the benchmark in up market and 5% worse in down market, assuming all other factors remain constant.

Exit Fee: Fee charged to investors when they redeem units from a fund.

Information Ratio: Measures the fund's returns above the benchmark returns relative to the risk (volatility) of the excess returns. It is a measure that identifies the consistency of the manager to outperform the benchmark.

Initial Fee: Fee charged to investors when they purchase units in a fund.

Management Fee: Percentage of the fund's assets that unitholders pay annually as remuneration to the investment adviser for managing the fund.

Ongoing Charge / Ongoing Charge Fee (OCF): Charge unitholders pay annually which relates to the costs of running a fund. The OCF takes into account the Investment Management Fee and all the expense of running a fund.

R Squared: Reflects the proportion of fund performance explained by changes in the benchmark. A high R-squared indicates the fund's performance has been in line with the benchmark. A low R-squared indicates the fund's performance has not been in line with the benchmark.

Service Fee: Percentage of fund's assets that retail unitholders pay annually for distribution services.

Sharpe Ratio: Measure of the fund's risk adjusted performance calculated as the portfolio returns in excess of the risk-free rate, divided by the risk (volatility) i.e. the Standard Deviation. The higher the Sharpe Ratio the better the returns compared to the risk taken.

Total Expense Ratio (TER): Estimated percentage (annualized) of fund assets used to pay for management fees and operating expenses, including service fees (if any) incurred by the fund. Fund expenses are reflected in the NAV. When calculating the TER, PineBridge has used the amount of expenses that it has received or estimated in its capacity as the Fund's Manager. Please note that the expense ratio includes variable expenses that are based on a number of factors including fund size, transactions, and other expenses. No assurance can be given that the TER will be realized over any future given period.

Tracking Error: Reflects the degree of variability of fund returns in relation to the benchmark. The lower the number the closer the fund's historic performance is to the benchmark.

KEY RISKS

Potential Investors should consider the following key risks before investing in the Sub-Fund:

Equity Investing Risk: The value of shares and securities related to shares may fall due to issuer related issues, financial market dynamics and world events including economic and political changes. **Concentration Risk:** The Sub-Fund may invest in a limited number of securities compared to more diversified Sub-Funds or it may focus its investments and hold relatively large positions in, among other things, particular industries, countries, sectors, currencies or issuers. This may increase the volatility of the value of the Sub-Fund or for the Sub-Fund to bear losses and may also limit the liquidity of certain securities within the Sub-Fund. **Derivative Risk:** A Sub-Fund may use derivative instruments for both efficient portfolio management and for investment purposes. Derivative transactions may be subject to significant volatility which may result in a loss greater than the principal amount invested. **Counterparty Risk:** A Sub-Fund may have credit exposure (by virtue of position in swaps, repurchase agreements, FDI etc.) to its trading parties and may bear the risk of default of the counterparties. **Operational Risk:** A Sub-Fund may risk loss resulting from process failures, inadequate procedures or controls. **Currency Risk - Base Currency:** Securities may be denominated in currencies different from the Sub-fund's Base Currency and there is a risk that changes in exchange rates and exchange control regulations may cause the value of the assets expressed in the Base Currency to rise or fall. **Liquidity Risk:** The risk that the Sub-Fund may invest some of their assets in illiquid securities and other illiquid financial instruments, in respect of which they may not always be possible to execute a buy or sell order at the desired price or to liquidate the open position. **ESG Risk:** Risks associated with the environmental, social and governance variables, which could potentially affect the financial situation or operating performance of the Fund. These include sustainability risk, ESG Categorisation Risk and ESG Data Risk. **Smaller Companies Risk:** Smaller companies are likely to be traded in lower volumes than more established large companies. Consequently, these securities may be more illiquid and subject to more volatility. In addition, the quality, reliability, transparency and availability of information on such companies may be more limited. Rules regulating corporate governance on small companies may be less developed or less stringent.

The risk factors described above should not be considered an exhaustive list of risks, which potential investors should consider before investing in the Sub-Fund. For more details on the fund's potential risks please read the Prospectus and Key Investor Information Document at pinebridge.com/funds

IMPORTANT INFORMATION

This is a marketing communication. This is not a contractually binding document. Please refer to the Prospectus of the UCITS and to the KIID and do not base any final investment decision on this communication alone.

This marketing document relates to PineBridge Global Funds (the "Fund") and its Sub-Fund PineBridge Europe Small Cap Equity Fund (the "Sub-Fund").
