

Investment Process Highlights

The team's investment approach is based on thematic idea generation, a systematic framework for analyzing companies and proactive risk management. Utilizing this approach, the team seeks to construct a focused portfolio designed to maximize alpha while limiting downside risk over the long term.

Thematic Idea Generation

- Identify inflections in multi-year trends caused by changes in supply/demand dynamics, societal behavior, market conditions, technology, laws/regulations and business models, among other variables—these can lead to powerful re-ratings of industries and companies
- Find areas where the team's views on industry fundamentals differ from consensus estimates—a key element in alpha generation

Systematic Analytical Framework

- Apply a systematic framework for analyzing companies across sectors and themes, creating a repeatable and methodical decision-making process
- Focus on multi-year earnings power differentiation, expected outcome scenario analysis, return on invested capital and discounted cash flow valuations using the team's proprietary company models
- Utilize internally developed visual outputs to consistently evaluate positions across the portfolio

Proactive Risk Management

- Incorporate risk management into all stages of the investment process
- Evaluate metrics including crowding, correlation, volatility, stress tests, liquidity, factor analysis and macro drivers, in order to inform portfolio construction and position sizing
- Where appropriate, use various instruments, such as options, in an effort to magnify alpha and minimize downside

Past performance does not predict future returns. Performance is NAV to NAV, including reinvestment of dividends and capital gains, if any, and is net of fees and expenses, excluding any subscription or redemption charges which may be levied. At the moment, the Fund does not intend to charge subscription or redemption fees. The Fund may be offered in different share classes, which are subject to different fees, expenses and inception dates (which may affect performance), have different minimum investment requirements and are entitled to different services. Funds are actively managed and are not managed to a benchmark index.

Investment Risks: Investments will rise and fall with market fluctuations and investor capital is at risk. Investors investing in funds denominated in non-local currency should be aware of the risk of currency exchange fluctuations that may cause a loss of principal. These risks, among others, are further described on the next page, which should be read in conjunction with this material.

Current and future portfolio holdings are subject to risk. A non-diversified portfolio may invest a larger portion of assets in securities of a smaller number of issuers and performance of a single issuer may affect overall portfolio performance greater than in a diversified portfolio. The portfolio's use of derivative instruments may create additional leverage and involve risks different from, or greater than, the risks associated with investing in more traditional investments. High portfolio turnover may adversely affect returns due to increased transaction costs and creation of additional tax consequences. Securities of small- and medium-sized companies tend to have a shorter history of operations, be more volatile and less liquid and may have underperformed securities of large companies during some periods. International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods and economic and political systems, and higher transaction costs. These risks typically are greater in emerging markets. Investments will rise and fall with market fluctuations and investor capital is at risk. Investors investing in strategies denominated in non-local currency should be aware of the risk of currency exchange fluctuations that may cause a loss of principal. Investments will rise and fall with market fluctuations and investor capital is at risk. The costs associated with this fund will impact your return over time. These risks, among others, are further described in the Fund Documents.

This is a marketing communication. Further fund details, including risks, fees and expenses, and other information, such as ESG practices, are set out in the current Prospectus, Supplements, Key Investor Information Documents (KIIDs) and other documentation (collectively, the Fund Documents), which can be obtained by calling +44 (0) 207 766 7130 or visiting www.apgfunds-docs.com. Please refer to the Fund Documents and consider all of a fund's characteristics before making any final investment decisions.

Portfolio holdings are displayed in the context of marketing the fund shares and not the marketing of underlying portfolio securities. Securities referenced may not be representative of all portfolio holdings. Securities of the same issuer are aggregated to determine a holding's portfolio weight. Portfolio statistics calculations exclude outlier data and certain securities which lack applicable attributes, such as private securities. Artisan Partners may substitute information from a related security if unavailable for a particular security. This material is as of the date indicated and is subject to change without notice.

Exposure Pct Assets represents the portfolio's exposures based on the economic value of investments (including delta-adjusting options exposures). Delta-adjusted options exposure is a measure of the market exposure created by the options and accounts for the sensitivity of options to changes in price of the underlying security. In comparison, measuring the exposure of an option at the market value of the option or notional value can understate or overstate, respectively, the economic exposure and risk. This estimate of portfolio exposure is only an approximation of the portfolio at a point in time.
