

Global X Renewable Energy Producers UCITS ETF (RNRG)

USD Accumulating Share Class
As of 31 Jan 2024

KEY FEATURES

All information below correct as of 31 January 2024

High Growth Potential

Cumulative investment across carbon capture technologies could reach \$154bn by 2050, highlighting just one of several growth opportunities for this theme (Source: International Energy Agency, May 2021).

Compelling Economics

The cost of generating electricity from renewables plunged over the past decade, making many use cases competitive or even cheaper than fossil fuel equivalents (Source: International Energy Agency, Apr 2021).

Conscious Approach

The ETF incorporates the Environmental, Social & Governance (ESG) proxy voting guidelines from Glass Lewis.

Capital at Risk. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.

PERFORMANCE (%)

	YTD	1M	3M	12M	Since Inception
ETF	-9.30%	-9.30%	12.51%	-23.70%	-31.79%
Index	-9.27%	-9.27%	12.71%	-23.40%	-31.20%
Difference	-0.03%	-0.03%	-0.20%	-0.30%	-0.59%

Performance is based on the fund's NAV and is shown on a total return basis (i.e., with gross income reinvested, where applicable). The fund's NAV may differ from its market price and, as a result, individual shareholders may realize returns that are different from the NAV performance. Cumulative return is the aggregate amount that an investment has gained or lost over time. Annualised return is the average return gained or lost by an investment each year over a given time period.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in past performance calculations.

DEFINITIONS

Indxx Renewable Energy Producers v2 Index The Indxx Renewable Energy Producers v2 Index is designed to track the performance of companies that produce energy from renewable sources such as wind, solar, hydroelectric, geothermal, and biofuels.

A Prospectus and Key Investor Information Document (KIID) for this scheme is available in English at globalxetfs.eu/funds/RNRG

¹Ongoing Charges is a measure of the total costs associated with managing and operating an investment fund. These costs consist primarily of management fees and other expenses such as trustee, custody, transaction and registration fees, and other operating expenses. The total cost for the fund is divided by the fund's total assets and expressed as a percentage.

The Global X UCITS ETFs are regulated by the Central Bank of Ireland.

This is a marketing communication.

Please refer to the relevant prospectus, supplement, and the Key Information Document ("KID") of the relevant UCITS ETFs before making any final investment decisions.

Investors should also refer to the section entitled "Risk Factors" in the relevant prospectus of the UCITS ETFs in advance of any investment decision for information on the risks associated with an investment in the UCITS ETFs, and for details on portfolio transparency. The relevant prospectus and KID for the UCITS ETFs are available in English at www.globalxetfs.eu/funds.

Investment in the UCITS ETFs concern the purchase of shares in the UCITS ETFs and not in a given underlying asset such as a building or shares of a company, as these are only the underlying assets that may be owned by the UCITS ETFs.

A UCITS ETF's shares purchased on the secondary market cannot usually be sold directly back to a UCITS ETF. Investors must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them. Changes in exchange rates may have an adverse effect on the value price or income of the UCITS ETF.

Past performance of a UCITS ETF does not predict future returns. Future performance is subject to taxation which depends on the personal situation of each investor, and which may change in the future. Neither past experience nor the current situation are necessarily accurate guides to the future growth in value or rate of return of a UCITS ETF.

Investment may be subject to sudden and large falls in value, and, if it is the case, the investor could lose the total value of the initial investment. Income may fluctuate in accordance with market conditions and taxation arrangements. The difference at any one time between the sale and repurchase price of a share in the UCITS ETF means that the investment should be viewed as medium term to long term.

Any investment in a UCITS ETF may lead to a financial loss. The value of an investment can reduce as well as increase and, therefore, the return on the investment will be variable.

Global X ETFs ICAV is an open-ended Irish collective asset management vehicle issuing under the terms of its prospectus and relevant supplements as approved by the Central Bank of Ireland and is the issuer of certain of the ETFs where stated.

Global X ETFs ICAV II is an open-ended Irish collective asset management vehicle issuing under the terms of its prospectus and relevant supplements as approved by the Central Bank of Ireland and is the issuer of certain of the ETFs where stated.
