INVESTMENT OBJECTIVE

The fund aims to deliver an attractive total return while bearing less-than-commensurate market risk by investing in a diversified portfolio of senior secured floating-rate debt of European corporations. With a belief that avoidance of defaults is a key source of superior performance, we deploy a rigorous asset selection process and tend to underweight the bottom tier of credit quality.

PORTFOLIO COMMENTARY¹

The European senior loan market saw a negative return in February, though still far outperformed European high yield bonds. In the context of significant market weakness, the drop experienced by European senior loans was very modest. The Fund underperformed its benchmark in February. Our loans allocation outperformed the broader loan market, benefitting from good credit selection. This was outweighed, however, by the negative attribution from our fixed-rate bonds holdings (not present in the benchmark) which underperformed loans over the month. We are pleased to report that the Fund has no exposure to companies domiciled in Ukraine, Russia and/or Eastern Europe. We rarely invest in these geographies because the legal framework and investor protections are so weak. Your portfolio companies also have relatively limited sales to Russia/Ukraine and little in the way of operating facilities in either geography. That said, there are a number of indirect factors we are assessing that will inevitably have some impact on Western European economies and therefore our portfolio companies, including exacerbating cost of living pressures. We have been assessing these factors since far before this crisis but are now rerunning our analysis given that, for example, energy costs are set to run even higher than expected. We are cognizant that this will impact some sectors (for example, Chemicals) and some names more than others and so are building this into the ongoing relative value discussion that underpins portfolio construction.

PERFORMANCE DISCLOSURES

Oaktree makes no representation, and it should not be assumed, that past investment performance is an indication of future results. Moreover, wherever there is the potential for profit, there is also the possibility of loss.

The performance results displayed herein represent the investment performance record for the Oaktree European Senior Loan Fund (the "Fund"), a Sub-fund of the Oaktree Capital Management Fund (Europe), which is predominantly invested in European senior loans. Oaktree values the Fund in euros, and on a trade date basis. Performance results reflect currency gains and losses associated with converting local currencies to euros and gains and losses from euro currency hedging activities.

The NAV is calculated by the fund administrator on the first business day of the month. In order to mitigate the dilution effect of redemptions and subscriptions, the NAV may be adjusted upwards or downwards on any valuation date to reflect the actual cost of net flows.

The Credit Suisse Western European Leverage Loan Index represents the European Senior Loan Fund's benchmark. It is designed to mirror the universe of the Western European leveraged loan market. The index includes loans denominated in U.S. dollars and Western European currencies. Loans must have a minimum initial spread of Libor + 125 bps, and be a funded loan. The index includes distressed and defaulted loans. The index returns presented are computed on a hedged basis to euro and converted to a base currency of euro. Returns for the index are before fees and expenses. Sources of foreign exchange rates may be different between the Fund and the index.

New issue leverage loan volume is sourced from S&P Capital IQ.
